## DETAILED ACTION

### Summary

On July 17, 2006, an Office Action was sent to the Applicant rejecting claims 1-65. On August 28, 2006, the Applicant responded with arguments.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 1-65 are rejected under 35 U.S.C. 103(a) as being unpatentable over Powar (6,438,527) in view of Wilz (6,510,997).

Powar discloses a method for paying bills electronically by means of scanning the code to process an electronic payment as claimed in claims 1-65 (col.5, line 45 to col.6, line 45); however, Powar does not disclose providing print data to a printer and is silent with regard to use of the Internet (online). Wilz teaches a method for a bar-code scanner for integration with the Internet comprising providing print data to a printer and

using the Internet to access various websites (col.3, lines 15-25; col.4, lines 59-65; and col.15, line 54 to col.16, line 25). It would have been obvious to one having ordinary skill in the art at the time the invention was made to substitute the scanner taught by Wilz into the invention disclosed by Powar to provide the user with an alternative means of accessing a biller site for paying bills and providing print data to a printer.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-65 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***
